Objective and Investment Policy

By subscribing to Amundi MSCI World Climate Paris Aligned Umweltzeichen UCITS ETF you are investing in a passively managed UCITS whose objective is to replicate as closely as possible the performance of the MSCI World Climate Change Paris Aligned Low Carbon Select strategy index (the "Strategy Index") regardless of whether it experiences a positive or negative development. The maximum tracking error objective between the growth of the net asset value of the Fund and that of the Strategy Index, under normal market conditions, is specified in the Fund's prospectus. The total net return Strategy Index (i.e. accumulating interest), net dividends reinvested, denominated in US dollars, is calculated and published by the index provider. You are exposed to the currency risk between the currencies of the equities comprising the Strategy Index and the Fund's currency. You are not, however, exposed to currency risk between the currency of the Strategy Index and the currency of the Fund. More information on the composition and operating rules of the Strategy Index can be found in the prospectus and on msci.com. The Index is available via Bloomberg (MXWOPCNU). To replicate the MSCI World Climate Change Paris Aligned Low Carbon Select Strategy Index, the Management Company applies a "passive" type of management using the direct replication method which consists of investing in financial securities that are part of the MSCI World Climate Change Paris Aligned Low Carbon Select Strategy Index in proportions that are extremely close to those of the Index. To generate additional yield, the Fund may make collateralised temporary purchases and sales of securities. The UCITS has a greenhouse gas emission reduction objective within the meaning of Article 9 of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (the "Disclosure Regulation"). The UCITS is subject to a sustainability risk as defined in the risk profile in the prospectus.

Calendar year performance* (Source: Fund Admin)

	2025	2024	2023	2022	2021
Portfolio	19.94%	25.59%	34.28%	-25.64%	-
Benchmark	20.23%	25.89%	34.55%	-25.47%	-
Spread	-0.29%	-0.30%	-0.27%	-0.17%	-

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

Risk indicators (Source: Fund Admin)

	1 year	3 years	Inception to date *
Portfolio volatility *	15.44%	15.92%	17.85%
Benchmark volatility	15.43%	15.92%	17.86%
Ex-post Tracking Error	0.05%	0.05%	0.06%
Sharpe ratio	7.72	7.86	6.31

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk. The Tracking Error indicator measures the performance's difference between the fund and the benchmark

Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

⚠ The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. The use of complex products such as derivatives can lead to increased movement of securities in your portfolio. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI MSCI WORLD CLIMATE PARIS ALIGNED UMWELTZEICHEN UCITS ETF prospectus.

Index Data (Source : Amundi)

Description of the Index

The MSCI World Climate Change Paris Aligned Low Carbon Select Index is an equity index based on the MSCI World Index ("Parent Index") representative of the large and mid-cap markets across 23 developed countries (as of March 2020). The index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) label minimum requirements.

Parent index : **MSCI WORLD**

Socially Responsible Investment (SRI)

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

Evaluation by ESG criteria (Source: Amundi)

	Benchmark	Parent index
Overall Rating	7.00	6.85
Environment	6.73	6.44
Social	4.87	5.04
Governance	5.71	5.77

Parent index : **MSCI WORLD**

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies.

Environmental, Social, and Governance risks and opportunities are posed by large scale trends (e.g. climate change, resource scarcity, demographic shifts) as well as by the nature of the company's operations.

Scores are on a 0-10 scale, with 10 being the best.

"E" for Environment (Climate Change, Natural Resources, Pollution & Waste and Environmental Opportunities)

"S" for Social (Human Capital, Product Liability, Stakeholder Opposition and Social Opportunities)

"G" for Governance (Corporate Governance and Corporate Behavior)

Carbon footprint**Carbon footprint: carbon emissions per euro million invested**

Total carbon portfolio footprint (Index/Parent index) : **Benchmark** 8.98 **Parent Index** 45.34

Parent index : **MSCI WORLD**

Carbon footprint

This indicator measures the portfolio's carbon emissions in metric tonnes of carbon equivalent (tCO₂e) per euro million invested.

This is an indicator of the emissions generated by investment in this portfolio.

Definition of scopes :

- **Scope 1** : all emissions that arise directly from sources that are owned or controlled by the company.

- **Scope 2** : all indirect emissions generated by the purchase or production of electricity, steam or heat.

- **Scope 3** : All other indirect emissions, upstream and downstream of the value chain. For reasons of data robustness, Amundi has chosen to use emissions from activities upstream of Scope 3 - Source: Trucost EEI-O model (input/output model extended to the Trucost environment).

Source : The carbon emissions data is supplied by Trucost. It corresponds to companies' annual emissions expressed in tCO₂e, which covers the six greenhouse gases defined in the Kyoto protocol whose emissions are converted into global warming potential (GWP) in CO₂ equivalent.
